

ELECTRIC INSERTS & FIREPLACES

regency-fire.com

WHY CHOOSE REGENCY?

Regency has established itself as a provider of high-quality products for more than 40 years. As a result, our customers are able to choose from a diverse range of premium and sustainable heating options and enjoy durable products that last a lifetime.

SAFE FOR KIDS

Regency's new electric fireplaces provide the comfort and ambiance of a traditional fireplace without the need for gas lines and vents. Since there is no combustion, the glass does not heat up which makes it fitting for kid-friendly environments.

HIGH RISE FRIENDLY

With electric fireplaces, there is no need for fuel lines, chimneys, or exterior venting which allows them to be installed into virtually any space. As a result, they are the perfect candidate for apartments and condos.

EASY INSTALLATION

Choose between a plug or hardwire kit (provided with each fireplace), to have endless spaces as installation options. This trouble-free installation also presents benefits in the form of cost savings and minimal time to set up.

Why Regency? Because it's *more* than a fireplace!

Electric Inserts

Flames so realistic, you'll forget it's electric! The Regency lineup of modern electric inserts combines expert craftsmanship with sleek, contemporary design. Enhanced flame effects and extra-deep beds of lifelike logs or crystals create stunning depth and realism. Featuring advanced Chromalight LED technology with a wide range of lighting combinations, these inserts deliver captivating visuals and a true 3D flame experience. With high-efficiency heating, a clean modern look, and easy installation, Regency electric inserts are an effortless choice for comfort and style.

Premium Electric Insert

Ei29LCD show with driftwood logs, 3 sided faceplate and premium white surround

FEATURES

- Option to install as a 5,000 BTU heater with 120V and combustible materials, or 9,500 BTU heater with 240V and non-combustible materials
- LCD screen with 9 unique flame options, spark effects, and crackling sounds
- Top-down lighting enhances realism and reflection on the log set, providing a sense of depth
- 14 fuel bed colour options and 5 levels of brightness
- Pick one colour to suit your vibe or automatically cycle through them all
- Customize your look with split oak, birch, or driftwood-style log sets
- Included remote control to adjust the power, heater, flames, brightness, and desired temperature
- Option to control the power, flame, and heater with discreet integrated buttons
- 3 and 4-sided finishing trims are included, for an easy out-of-the-box install

DIMENSIONS

Width (front)	29-1/2"
Width (back)	22-15/16"
Height	19-7/8"
Depth	12"

Convenient Control •

Both the innovative App and Remote Control allow you to adjust the Regency Electric Fireplace's array of Chromalight® visuals and convenient heating settings.

NOTE: App is not available for Studio Fireplaces. Not all functions are available on Skope & Studio Fireplaces. Refer to specific product manuals for detailed remote functions.

MAIN FLAME AND FLAME PALETTE

The primary and secondary flames can be independently set to eight different colours or the Spectrum Mode, a rolling cycle that gradually transitions through all colours. Speed and brightness can be tailored to create a customized visual.

GLOWING EMBERS

Beneath the logs and ember effects, the up-lighting LEDs can be set to eight colours to either match or contrast with the flames. Like the flames, there is also a Spectrum Mode to cycle through each colour as well as adjustable brightness for all settings.

NATURAL LOG LIGHTING

Burnt Ember Logs illuminate the Oak or Birch log sets, and feature 12 colours and a Spectrum Mode setting with adjustable brightness.

DOWN-LIGHTING

Hidden in the top of the firebox are discreet down lighting LEDs which bathe the fuel effects in eight different hues to either match or contrast with the other settings, adding to the immersion.

SYNCHRONISE VISUALS

The Sync feature lets you synchronise the Ember bed up-lighting and down-lighting with the Main Flame colour, to easily create a corresponding display.

QUICK START PRE-SETS

Need instant ambiance? Select from any of the six stunning pre-sets ranging from natural to contemporary. You can also save up to three custom combinations with your preferred settings for easy access.

OPTIONAL MOOD LIGHTING

Effortlessly control the optional Mood Lighting system using either the remote control or the app. Choose from 13 different colours or the gradually changing Spectrum mode to transition through each colour.

ADAPTIVE START CONTROL

Adaptive Start allows the fireplace to automatically turn on up to 45 minutes in advance of a pre-set time to reach the desired room temperature, ready for when you sit down and relax.

TIMERS AND SCHEDULING

The fireplace also allows you to programme individual day and weekly schedules for both flames and heat, providing warmth or ambience exactly when you want it.

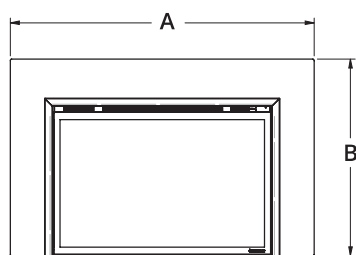

OPEN WINDOW DETECTION

Should ambient room temperatures drop by 4°C within a space of five minutes, like when a window is opened, the fireplace's heater will automatically turn off to save energy. Heating can be easily resumed with the remote control or app.

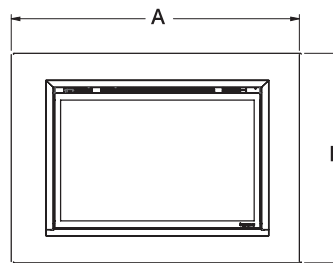

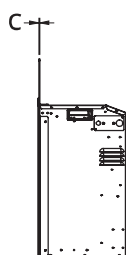

THERMOSTATIC HEATING

Choose your preferred room temperature and the fireplace does the rest for you. Select between 15°C and 25°C and the fire's 1.5 kW heater will adjust its power to reach the desired level as efficiently as possible. Turn off the heat entirely to enjoy the visuals during the warmer months.
